DETAILED ACTION

CLAIMS

Summary

Claims 1 and 16 are the independent claims under consideration in this Office Action.

Claims 2-15 and 17-28 are the dependent claims under consideration in this Office Action.

Claim Rejections - 35 U.S.C. § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Referring to claim 1, the words "that the batches are joined" do not set forth a positively recited method step. Perhaps "joining the batches" and "spanning" would help.

Referring to the dependent claims, these claims do not further present positive method steps. For example, in claim 2, the words "which is conveyed" do not present a positive method step.

Claim Rejections - 35 U.S.C. § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7, 12, 13, 15-20, 22, 24, 27 and 28 are rejected under 35 U.S.C.

§ 102(b) as being anticipated by Jones et al. (3,567,565).

Jones et al. teach a method for manufacturing a fabric and disclose the mat including several tape-like strips 2 sewn together by spanning stitches and bonded to a backing 16. The stitching includes a chain stitching and with spanning portions on the top surface and the bottom surface of the tapes. The spanning portions include spans of a zero angle relative to a transverse direction of the tapes and on the other side include angled criss cross portions. This arrangement provides stability to the tapes and keeps them secure and aligned as desired. The structure of the mat is defined in the claims and the use of the mat has little patentable weight in an apparatus claim.

ALLOWABLE SUBJECT MATTER

Claims 8-11 and 14 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. § 112.

Claims 21, 23, 25 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

PERTINENT CITATIONS

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dowell et al. Iwai, Benstead et al. McLoughlin, Kamitani, Weinberg and Duhl illustrate materials which include chain stitches with spanning portions for stabilizing the materials.
